AI Ethics & Responsible Usage Declaration

I hereby declare that:

- The dataset used in this assignment is properly cited and ethically sourced.
- I have analyzed potential biases present in the dataset and model.
- I have considered privacy implications related to the data used.
- I understand the responsible and ethical usage of the developed system/model.
- This work adheres to institutional guidelines on ethical AI practices.

Dataset Details:

Source: National Stock Exchange (NSE) Historical Data

Type of Data: Time-series financial data (stock prices)

Contains Personal/Sensitive Data? (Yes/No): no

If Yes, describe anonymization steps: Not applicable

Identified Bias (if any):

The dataset represents stock price movements over a limited time period (~1 month), which may

introduce temporal bias.

The ARIMA model relies purely on historical numerical patterns and does not consider external

influencing factors such as:

- Market news
- Economic conditions
- Political events

As a result, predictions may not fully reflect real-world market behavior.

Care has been taken to interpret results cautiously and avoid misleading conclusions.

Responsible Usage Statement:

- The developed ARIMA model is intended strictly for educational and academic purposes.
- The predictions generated are not guaranteed to be accurate and should not be used for financial decision-making or investment purposes.
- Users of this model should understand that:
  - Stock markets are influenced by unpredictable real-world factors
  - Statistical models have limitations in capturing such complexities
- Misuse of this model for real-world financial gain is discouraged.
